

SoilEx Environmental Ltd

Net Zero Commitment Statement

Our Commitment

At SoilEx Environmental Ltd, we recognise the urgent need for decisive action to tackle climate change. As a company dedicated to sustainable land, soil, and waste management solutions, we are committed to playing our part in building a net zero future.

We pledge to align our greenhouse gas (GHG) emissions reductions with the Science Based Targets initiative (SBTi) and the goals of the Paris Agreement: limiting global warming to 1.5°C above pre-industrial levels.

Our Targets

To achieve this, SoilEx Environmental Ltd will:

1. **Near-Term Target (by 2030)**

- Reduce absolute Scope 1 and 2 emissions by **50%** against our 2023 baseline.
- Begin measuring and reporting Scope 3 emissions and target reductions in material categories (such as transport, purchased goods, and waste).

2. **Long-Term Target (by 2050)**

- Achieve at least a **90% reduction in Scopes 1, 2, and 3 emissions** from our 2023 baseline.
- Neutralise any remaining residual emissions through credible, permanent carbon removal technologies and natural solutions.

Our Actions

- Transition to renewable energy across all offices and facilities.
- Electrify our vehicle fleet and prioritise low-emission logistics.
- Implement efficiency measures in operations and client services.
- Work with suppliers and partners to reduce indirect emissions.
- Promote innovation in soil recovery, waste management, and environmental regeneration that supports wider decarbonisation.

Our Purpose

Climate action is at the heart of SoilEx Environmental Ltd's mission to create positive environmental outcomes. By committing to a science-based pathway to net zero, we ensure our operations not only minimise harm but actively contribute to a healthier, more sustainable planet.

Signed

Alex Collman
